Pragati Maidan, New Delhi, India.**

Conference on New & Emerging Technologies for Healthcare 4th February 2019::1000 Hrs:: Hall 12A,Pragati Maidan New Delhi

Draft Programme

0945 - hrs

Inaugural Session - New & Emerging Technologies for Healthcare

Setting the context - India has shown remarkable progress in improving healthcare standards over the last 25 years. New players and technology have entered the healthcare landscape in the past few years, accelerated by a growing start-up and entrepreneurial culture, and disrupted the system. Mobile applications that act as appointment portals to portable medical devices that connect to a Cloud have been introduced, changing the way healthcare is delivered and how patients want to experience it. How are these new players and technologies changing the current landscape?

Welcome Remarks by **Mr Chandrajit Banerjee**
Director General
Confederation of Indian Industry

Setting the Context **Ms Shobana Kamineni**
Past President, CII &
Executive Vice-Chairperson
Apollo Hospitals Enterprise Limited

Special Address **Ms Preeti Sudan**
Secretary
Ministry of Health & Family Welfare, Govt of India

Special Address by
Special Guest **H.E. Kenji Hiramatsu**
Ambassador of Japan to India

Release of the Exhibition Catalogue

Special Address by
Chief Guest **Dr Jitendra Singh**
Hon'ble Minister of State for Development of North
Eastern Region(IC), Minister of State for Prime Minister
Office Personnel, Public Grievances & Pensions,
Department of Atomic Energy and Department of Space

Vote of Thanks **Mr Himanshu Baid**
Chairman, CII Medical Technology Division & Managing
Director Polymedicure Ltd

HEALTH TECH INDIA 2019

2nd International Exhibition & Conference on Medical Equipments,
Technology, Pharma and Healthcare Products & Services

3rd - 5th February 2019,
Pragati Maidan, New Delhi, India.

1130-1215 hrs

Plenary Session 1: Digitalization of Healthcare - 'Creating quality & efficiencies through Technological Access to Healthcare/ E Health

The success of any health system can be measured by its ability to ensure equitable access to quality healthcare at an affordable cost. Health information technology (IT) and E-Health create ways for professionals and the public to understand and use health information. Technology has redefined quality and access to health by offering innovative solutions such as telemedicine, health management information systems (HMIS), technological advancements in the form of diagnostic and therapeutic equipment's etc. Innovations across the chain of care offer the opportunity for resolving issues of access, and affordability to basic healthcare services.

Digital transformation is about the steps a company needs to take to respond to customers who have come to expect a certain level of interaction at the digital level. Companies need to think about how to start incorporating all this data into making better decisions incrementally and at a better pace.

Thrust area: Focus on addressing the need of technology and innovations in delivering healthcare

Session Chairperson &
Moderator

Mr Sumit Puri
Chief Information Officer
Max Healthcare Ltd

Special Address

Dr Indu Bhushan*
CEO, Ayushman Bharat Pradhan Mantri Jan Arogya Yojna
(PMJAY) and
National Health Authority (NHA)

Panelists

Dr Nishant Jain
Deputy Programme Director Indo-German Social Security
Programme Deutsche Gesellschaft für Internationale
Zusammenarbeit (GIZ)

Dr Kuljit Singh
President
Association of Private Hospitals (APHM)
Malaysia

Mr Suraj Kumar
Senior Vice President
Siemens Healthineers, India

Mr Joy Chakraborty
Chief Operating Officer
P D Hinduja Hospital

Dr Charit Bhograj*
Founder
Tricog Health

2nd International Exhibition & Conference on Medical Equipments,
Technology, Pharma and Healthcare Products & Services

3rd - 5th February 2019,

Pragati Maidan, New Delhi, India.

1215 -1300 Hrs

Plenary Session 2: Innovations that are driving the Med Tech Sector In India today.

While it is true that many enabling factors have been catalyzed towards creating an encouraging ecosystem for innovators and entrepreneurs, however challenges related to funding gaps and tedious regulatory mechanisms exist. These along with a lack of encouraging R&D in Indian universities, poor investments in research /innovation have resulted in Indian device manufacturers remaining hugely dependent on imports. Other challenges of not achieving scale/ and an overburdened system have led to a reluctance to innovate and adopt new technology – what therefore are a few enablers that can be leveraged/a few low hanging fruits that can be reaped towards making & innovating in India?

Moderated by

Mr Probir Das

Executive Officer- Terumo Corporation, Japan
Regional Leader – India & Asia Pacific
Chairman - Terumo Asia Holdings Pte. Ltd.

Dr Alka Sharma*

Adviser
Department of Biotechnology
Govt Of India

Panelists

Mr Raghavendra Shenoy

Chief Commercial Officer
Johnson & Johnson Medical India

Mr Anupam Gupta

Advisor
Quality Council of India (QCI)

Mr Rohit Sathe

Managing Director
Philips Healthcare

Mr Prabal Chakraborty

Co Chairman CII Medical Technology Division & Vice
President &
Managing Director
Boston Scientific India Pvt. Ltd

Mr Himanshu Baid

Chairman, CII Medical Technology Division & Managing
Director Polymedicure Ltd

Technology, Pharma and Healthcare Products & Services

3rd - 5th February 2019,
Pragati Maidan, New Delhi, India.

1300 -1400 Hrs

Plenary Session3: Artificial Intelligence - The future of Healthcare / and the challenges of Cyber security – moving forward cautiously

We all are aware that Artificial Intelligence is the future of Healthcare. Here we will discuss most recent and innovative work on the study and application of AI technologies in compelling healthcare scenarios. It will cover a wide spectrum of applications, from those aimed at easing and supporting healthcare professionals' work to those devoted to improving patients' lives.

AI solutions can augment the scarce personnel and lab facilities; help overcome the barriers to access and solve the accessibility problem; through early detection, diagnostic, decision making and treatment, cater to a large part of India.

Thrust Area: computational models, social computing, and agent-based solutions applied to practical solutions that address topics related to Healthcare brands.

Moderated by Session
Co-Chair **Dr P Ratnakar**
Vice President & Practice Head – Lifesciences
Tech Mahindra

Co-Chair **Ms Vaishali Bhagwat**
Advocate
Cyber Law Expert

Special Address **Dr Alok Kumar***
Adviser
NITI Aayog

Panelists **Dr Geetha Manjunath**
Founder, Niramai
AI Based Health-Tech Startup

Dr Suchita Ninawe*
Adviser
